

Pool Entry Systems

Advantage Access Systems™ and
The Great Barrier Ladder™

Advantage Access System™

Lomart's Advantage Access System™ is an exciting, pool entry system designed to offer an efficient and convenient way to enter or exit an above-ground pool. Much more than a standard pool ladder, the Advantage Access System™ allows pool users to sit comfortably on the in-pool steps for relaxation, or to keep a watchful eye on swimmers. **The entry system that does it all!**

Quality features include:

- **Rugged, Molded Resin Construction** for corrosion resistance and maximum durability.
- **Chemical resistant** for enhanced product longevity.
- **Huge, 36" Wide Stairs and Platform** allow swimmers to sit comfortably while others enter or exit the pool.
- **In-pool & Exterior applications.** The Advantage Access System™ is available as a complete interior/exterior unit or, a deck option.
- **Custom, Non-skid Design** reduces the chance of slippage, allows for comfortable seating, and helps prevent snagged swimsuits.
- **Stylish Appearance** to compliment both the pool design and any exterior setting.
- **Stainless Steel Handrail** for easy pool entry and exit.
- **Attaches to pool for total stability.**
- **Easy-to-assemble design.** Installs quickly with a common screwdriver.

Snap-locking, Exterior Staircase Cover to reduce the risk of unwarranted pool entry. Ideal for added security.

Vented, Safety Side Panels prohibit access under the staircase. In addition, the side panels prevent pool cleaners from getting entrapped, while allowing water to circulate through the staircase.

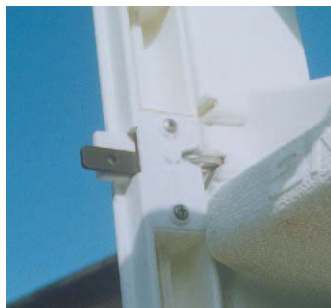

The Great Barrier Ladder™

Offers a secure way for friends & family to enter or exit an above-ground pool.

Features/Benefits:

- Available in "A" Frame and Deck configurations.
- Lomart's Great Barrier Ladders are designed for above-ground pools with 48" to 52" sidewalls.
- Specially Designed, Swing-up Treads secure the ladder when the pool is not in use.
- Self-Locking Pin System allows the treads to be removed for added protection from unauthorized pool entry. Ideal for extra security or end-of-the-season shutdown.
- Spring-loaded Tread Locking Feature can be used with padlocks for additional security.
- Extra Heavy-Duty Resin Construction for maximum durability, pool chemical resistance, and protection against damaging solar rays.
- Easy-to-assemble design provides maximum strength with minimal hardware.
- Secure Design Handrails bolt to the top rail for greater stability.
- 17" molded treads and platform for skid-resistance.
- Flared bottom footing assures superior balance.
- Independent tread adjustment both inside and outside of the pool. Allows for bi-level adjustments between decks or patios and the pool bottom.

External Barrier Treads can be flipped-up and automatically locked to discourage unauthorized entry into an above-ground pool.

Deck ladders can be used in dual applications:
Ground to Pool Deck or Pool Deck to Pool.

Change of Design: All sizes, weights, measurements, illustrations and other specifications are approximate. Lomart Industries expressly reserves the right to change or modify the design and construction of any product in due course of our manufacturing procedures without incurring any obligation or liability to furnish or install such changes or modifications on products previously or subsequently sold. Lomart Industries is in no way affiliated with any professional pool installer. Therefore, Lomart can assume no responsibility for errors in installation by the homeowner or said professional installer. If you have the pool installed by others, please supervise to be sure they comply with proper installation techniques as shown.

No Jumping or Diving allowed.
