# Never Buy, Mix or Measure Chlorine Again!

**No More Buying, Mixing or Handling Chlorine • No More Odor or Bleached Items • No More Itchy Skin or Red Eyes**

### Electronic Purification

Aqua Rite makes owning a pool fun and healthy - with easy and convenient purification. Chlorination that's easy to live with and water that's silky, smooth, and refreshing, automatically. At home or away, your pool water is being purified with Aqua Rite!

### Purification and Convenience

The Aqua Rite system generates its own chlorine from a small amount of ordinary table salt, dissolved in your pool water, to create 100% of your pool's purifying needs. A teaspoon of salt per gallon of water is all it takes to adjust your pool to work with Aqua Rite. Salt that doesn't wear out or evaporate, its just used over and over again. Day in - Day out, you have fresh, pure chlorine introduced evenly throughout your swimming pool from this common table salt. The Aqua Rite's soft, silky smooth water is perfect for all pools up to 40,000 gallons, plaster, pebble, vinyl, or fiberglass!

### Controls Automatically

That's right, the Aqua Rite automatically produces and disperses its own pure fresh chlorine while you enjoy a full season of swimming pleasure without adding chlorine. Just test your water and set to suit your preferences and you get the just right balance you want. And the Aqua Rite interfaces with many automation systems to make it even easier, just ask your pool professional for more info.

### Aqua Rite - See it & Try it.

Like tens of thousands of satisfied pool owners, you'll agree - your pool never looked so good, and the water feels great! Pure swimming pleasure. Aqua Rite's truly "The Clear Solution to Chlorination" for today's pools.

### Turbo Cell® - The Secret of Controlled Chlorination

- Unique offset design amplifies chlorine production & efficiency •
- The Turbo Cell's turbulent flow pattern ensures peak performance •
- Turbocharged with fast scrubbing action to speed purification & maximize longevity •
- Quick & easy installation with performance boosting minimal flow restrictions •
- Harnesses electrolytic co-generation safely & cost effectively •

The Turbo Cell, connected to the electronic control via a plug in cord, is simply plumbed into the return pipe to the pool. The filter pump pushes the water through the Turbo Cell where fresh chlorine is produced and then evenly disperses the pure fresh filtered water throughout the pool via the return jets. It couldn't be easier, more effective, or trouble free!
